Physics Careers & Navigating Your Path

Richard Abrantes (Sandia National Lab)

Physics degree holders are highly employable in both the private and public sectors. Students and early career scientists are often seeking additional guidance on non-academic career pathways that exist within industry. This talk will provide an overview and examples of common career paths taken by physics degree holders, give resources to assist with career exploration and the job search, and give a brief overview of my career path so far.

Host: Derek Schaeffer
